

We responded to your suggestions by adding more features *again!*

Remain current on your Maintenance Plan to automatically receive new features

We already added more than 65 new features and enhancements to Lectora this year – and now we’re releasing even more with Lectora Version 9! We’re holding true to our promise to provide added product benefits throughout the year as long as you remain current on your Lectora Maintenance Plan.

The features and enhancements in this latest product release not only help save time and effort in creating course content, but also enable you to easily create interactive and engaging elearning. Best of all - by staying current on your Lectora Maintenance Plan, you will automatically receive every new feature at no additional cost!

The new features in Lectora Version 9 include:

I’m an actual Flash character in Lectora!

Flash and Games Library – Keep learners engaged by easily adding interactive flash animations and games to your courses. Choose from a library of customisable flash games and animations such as flash cards, jigsaw puzzles, noughts and crosses, text animations, male and female characters, digital and analogue clocks, and more.

Chart Creator – Save time by quickly creating a variety of charts, such as bar, pie, and line charts based upon standard spreadsheet formatted data. Charts will appear as editable images that can easily be recreated.

Note Reports – Easily update course content while working on group projects by creating a printable report of all the notes in your title, thus providing a helpful quick reference.

Publish to iPhone – Stay on top of cutting edge technology and provide learners with multiple ways to access courses by choosing from ten templates and two wizards to publish Lectora titles conveniently for iPhone and iPod Touch.

Browser-Based AJAX Windows – Pop-up windows in HTML titles now appear in a modern, browser-based window, eliminating all pop-up blocker and message error issues that users may have previously experienced.

Stay current on your Maintenance Plan

- ✓ **Move to/Size to Animations** – When using move to or size to actions, your objects will automatically animate to the position or size you select and a slider will be added to enable users to adjust the speed of the animation, providing a better end user experience.
- ✓ **Edit Mode Navigation** – Navigate between pages easily while in edit mode by utilising the page up and down keys that enable you to quickly switch between pages.
- ✓ **Skinnable Flash Player** – Easily change the colour and style of your Flash Player by choosing from an array of Flash Player skins.
- ✓ **Streaming YouTube** – Enable learners to conveniently play a YouTube video directly in a Lectora title.
- ✓ **Object Search** – Quickly find objects by utilizing the new search function.
- ✓ **Enhanced Media Open Dialogue** – Conveniently play and preview all audio and video before adding it to your title.

Obtaining Lectora Version 9

Current Lectora 2008 users that have auto-update enabled within Lectora will automatically receive all the new features and enhancements in Lectora Version 9. Users who turned off the default auto-update can visit http://www.trivantis.com/support/downloads/serv_packs.html to download the latest version.
